PERSONALLY SPEAKING

giving you more for your heating dollar

Dear Friends,

We have all endured higher fuel prices for the past year or so. No one knows if prices will go higher or lower, or when either of these things may happen. Although the price of propane has risen, it is less than heating oil, and everyone is feeling the pain. **This is why we offer programs to protect your price and make your fuel costs more predictable.**

This year we are once again offering you the option to cap your fuel price. Due to volatility in the fuel markets, the price of cap "insurance" has gone up since last year, but we think it is important to offer you this choice. You can learn about all of our price protection options at PorcoEnergy.com.

Joe and Dominick Porco

No matter what you decide, you can rely on Porco Energy to provide the **best value for your heating dollar**. Your "gallon" of value includes a lot more than fuel, such as expert service, 24-hour-a-day emergency response, a dependable fuel supply, trained and certified drivers and technicians, and more. It's something to bear in mind when you see those lowball fuel offers pop up as the weather cools down.

Thanks for trusting us with your comfort. We look forward to keeping you warm and safe this winter, and for many winters to come.

Warmly,

Joe and Dominick Porco

high efficiency = money saved

How old is your heating system? If it's 15 years old or older, it might be time to consider a new boiler or furnace. Thanks to recent advances in fuel-burning technology, today's equipment is considerably more fuel efficient than older systems, and

up to
\$500
federal
tax credit

with fuel prices so high, this can translate into significant savings. Porco Energy has a range of high-efficiency propane and oil heating systems that may qualify for a federal tax credit of up to \$500. To learn

more about upgrading your heating system, please call us today and ask to speak to one of our sales consultants.

JOE'S FAMOUS ROAST PUMPKIN FONDUE

SPECIAL!

Receive
**50 gallons of
propane free**

with the purchase of any hearth product. And while you're gathered around the fireplace, try Joe's recipe for Roast Pumpkin Fondue.

Ingredients

- 1 15" piece of baguette, cut into 1/2" slices
- 1 7lb pumpkin
- 1 1/2 cups heavy cream
- 1 cup low sodium vegetable broth
- 1/2 tsp grated nutmeg
- 2 1/2 cups coarsely grated Gruyere cheese
- 2 1/2 cups coarsely grated Emmentaler cheese
- 1 Tbsp olive oil

Preheat oven to 450° and lightly toast baguette slices. Remove top of pumpkin and remove seeds and loose fibers with a spoon. Season inside with a little salt. Whisk together cream, broth, nutmeg and a little salt and pepper in a bowl.

Mix cheeses together in another bowl. Put a layer of the bread in the bottom of the pumpkin and cover with a cup of the cheese and 1/2 cup of the cream mixture. Continue layering bread, cheese and cream mixture until 1/2 inch from the top.

Put top on pumpkin, place in an oiled roasting pan and coat pumpkin with oil. Bake until pumpkin is tender and filling is puffed, about 1 1/4 to 1 1/2 hours.

- ★ still time to protect your price
- ★ our service plans save you money

our service plans are proactive

Most people associate the term “service plan” with an agreement they will probably never use. But that’s not the case with our Comfort Plan and our Worry-Free Plan, both of which include an **annual preventive maintenance tune-up** to keep your heating system operating at peak efficiency.

Both plans also include **priority service**, so if you ever lose your heat, you’ll move to the top of the list for service. When it’s below freezing and something goes wrong, it’s comforting to know that it won’t be long before we are there to fix the problem.

Our Comfort Plan covers the replacement of basic system components; our comprehensive Worry-Free Plan covers even more parts and repairs, and provides higher dollar allowances for replacing equipment. To learn more about our service plan options, go to PorcoEnergy.com and click on “Services.”

Call now or send in the enclosed card and we can begin your maintenance program with a heating system tune-up, which has the **potential to reduce your heating bills by 10% or more.**

we'll test your tanks

Our oil heat service plans include **TankSure®**, which provides an annual test and inspection of your aboveground or basement oil tank.

The inspection evaluates the safety and integrity of your tank using an ultrasonic testing technology approved by the U.S. Environmental Protection Agency. **Qualified tanks will be protected with a proactive tank replacement warranty of up to \$1,000.**

Snapshot

When Lori Daly joined our office staff in 2004, she already knew a lot about us.

“I was a Porco Energy customer and they had always impressed me with their

friendly and professional service,” says Lori, who has nearly 20 years of experience in the heating fuel business. “Because of my experience as their customer, I figured Porco would be a good company to work for—and I was right.”

Lori started with us as a receptionist but soon moved into sales, in charge of new accounts.

When someone calls us to inquire about our services, Lori takes that call.

“I start by asking them what their needs are and then explain how we can set up their account to meet all of those needs. This could include getting them enrolled in a monthly payment plan, a price cap and a service plan.”

Off the job, Lori enjoys spending time with her three children, who range in age from 14 to 28.
